

Capability Statement

Swyft Design & Development LLC · Senior-led software development, modernization and sustainment

Core competencies

- Custom software and web application development
- Software maintenance, monitoring and sustainment (managed Care Plans)
- Legacy system modernization and cloud migration
- Systems integration and API development
- CI/CD, automated testing and quality assurance
- Security updates, hardening and compliance support
- Data engineering and predictive analytics

Differentiators

Senior-led delivery

A senior engineer owns your system end to end and is accountable for everything that ships. No junior-team handoffs, no offshore subcontracting of the work you are buying.

Governed AI-augmentation

AI agents handle continuous monitoring, test generation and first-pass code review so issues surface early. A human engineer reviews and signs off on every change, and no sensitive or controlled data is entered into uncontrolled third-party tools.

Compliance-minded

Security-first delivery aligned to federal expectations. SOC 2 and NIST 800-171 readiness work is in progress; we do not claim certifications we do not hold.

Continuity

A vetted subcontractor bench and documented runbooks mean delivery does not depend on one person being available.

Past performance

TracPro Technologies LLC - TracPro Platform

Design and delivery of a custom project management and CRM web platform tracking commercial HVAC, lighting and refrigeration projects end to end, across internal staff and third-party contractor roles. Built as a React single-page application on Node.js services with AWS DynamoDB and Cognito, deployed to static hosting behind a CDN. Work spans MVP delivery through a subsequent major release, plus ongoing maintenance and support.

Role: Prime · Period of performance: 2025 - present · Reference available on request

Zaliis Group, Inc.

Ongoing custom software development and application maintenance for a commercial client, covering feature delivery, dependency and security updates, and production support.

Role: Prime · Period of performance: 2025 - present · Reference available on request

How to buy

- **Micro-purchase up to \$15,000** – payable by Government Purchase Card, no competition required. We accept the Government Purchase Card.
- **Simplified acquisition up to \$350,000** – FAR Part 13 procedures.
- **Subcontracting and teaming** – available as a sub to primes on larger vehicles.
- **Sole-source justification support** – documentation provided on request.
